Studies

Be part of progress.

The Zurich Breast Center

The Breast Center is a team of gynecologists, surgeons, oncologists, radiologists and plastic surgeons, supported by other specialists such as doctors for genetic counseling or complementary medicine, a psycho-oncologist and a sex therapist. Their goal is to provide holistic care, counseling, support and medical care for their patients with breast diseases.

They are also supported by our study department, breast care nurses, oncology nurse specialists, medical practice assistants (MPA) and medical-technical radiology assistants (MTRA).

The patient is the center of our attention.

All examinations necessary for a well-founded diagnosis, potential surgery as well as appropriate follow-up treatment can be carried out by one and the same team of doctors.

That means: We offer optimal care under one roof.
